EDUCATION

SVKM's Dwarkadas J. Sanghvi College of Engineering

Mumbai, India

Bachelor of Technology in Computer Engineering, Honors in Data Science (CGPA: 8.67)

2023 – 2027

EXPERIENCE

App Developer

Apr 2026 – Present

Triponovaa | dev.triponovaa.com

- Building a cross-platform travel booking product with **30+** screens spanning hotel, flight, and travel insurance workflows, translating complex booking journeys into mobile experiences.
- Integrated Travelport, TBO, and ZakPay APIs through modular service layers, aligning API capabilities with booking requirements and reducing duplicate logic across modules.
- Improved product responsiveness by caching frequently accessed API responses with Hive, preloading reference datasets, and implementing skeleton loading states.
- Developed reusable Flutter architecture and shared UI components, enabling faster feature delivery and easier maintenance across the application.

App Lead

Mar 2025 – Apr 2026

SVKM EduConnect | educonnect.svkm.ac.in

- Served as the primary point of contact between school stakeholders and the development team, translating workflow problems and feature requests into actionable product and engineering requirements.
- Coordinated feature planning and implementation decisions for chat, announcements, leave requests, appointment booking, attendance, and timetable workflows, consolidating WhatsApp groups, paper circulars, and manual processes into one platform.
- Implemented real-time messaging via WebSockets and collaborated with engineering through development, testing, and iterative product improvements.
- Coordinated releases across Play Store, App Store, and web, launching the product to **1,000+ Play Store downloads** while serving **40+** teacher profiles.

Flutter Developer Intern

Dec 2024 – Mar 2025

Quickyearning Pvt. Ltd. | quickyearning.com

- Developed and delivered DiamondRock, a **12-screen** cross-platform stock market product with real-time data, taking it through Play Store internal beta testing.

PROJECTS

Stock Research Assistant | *FastAPI, LangGraph, Python, LLMs*

Jul 2026

- Decomposed equity research into specialized LangGraph agents for market analysis, financial statements, news synthesis, verification, and investment report generation.
- Built FastAPI services for tool orchestration and structured market-data retrieval, applying verification guardrails to deliver context-aware, source-attributed decision support.
- Implemented persistent workflows, conversation memory, and asynchronous processing to execute the product flow from research request through generated investment report.

CricManager | *cricmanagernow.web.app | Spring Boot, Flutter, PostgreSQL, Docker, Python*

Jun 2026

- Built a cricket analytics product that transformed historical ball-by-ball data into Expected Runs and Win Probability using gradient boosting and calibrated logistic regression.
- Designed Spring Boot REST APIs and PostgreSQL-backed simulation services for score, wicket, match-outcome, and tournament-fixtures workflows, containerized with Docker.
- Delivered the end-to-end product through a Firebase-hosted Flutter Web experience with an interactive draft room, lineup constructor, and season simulation dashboard.

JackDSQL | *jackdsq.web.app | Spring Boot, PostgreSQL, Flutter, RabbitMQ, Redis, Docker*

May 2026

- Designed a dual-database architecture isolating the SQL sandbox from the main DB, ensuring atomicity across **270** SQL challenges and **29** foundation questions.
- Implemented security, automated cleanup, and query safety mechanisms; containerized all services via Docker Compose for consistent deployment.
- Built a Flutter SQL editor with result visualization and AI-powered hint generation (Groq/Gemini) for real-time error feedback and learning support.

TECHNICAL SKILLS

Languages & AI/ML: Java, Python, Dart, SQL, LangGraph, LangChain, LLMs, scikit-learn

Backend & Databases: Spring Boot, FastAPI, REST APIs, RabbitMQ, WebSockets, PostgreSQL, MongoDB, MySQL, Redis

Mobile, Web & DevOps: Flutter, BLoC, Provider, Dio, Docker, Firebase, Git, GitHub, Postman

EXTRA-CURRICULARS

BE Mentor, DJS Unicode: Mentored **9 students** through problem definition, feature planning, technical decisions, and execution; **7 of 9 mentees** collaborated to build **PROXIMI**, a peer-to-peer neighborhood rental platform. [GitHub](#)
